

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

an appropriated medicinal Fluid ; which was, without any Difficulty, retain'd within the Cavity near two Hours, and, at the Close of the Operation, drawn all off at once, without the least Symptom of a *Syncope* from Inanition ; of which I shall beg Leave to acquaint you further, when I see how she holds it, as well as of what else remarkable may occur in the Course of my Practice. I am, with the greatest Regard to the Learned, Worthy Gentlemen of the *Royal Society*,

S I R,

Your most obliged,

Truro, May 12.

1744.

and obedient humble Servant,

Chr. Warwick.

V. *A Letter from John Bevis, M. D. to John Machin, Esq; Secret. R. S. &c. containing some Observations concerning Mercury.*

S I R,

Presented May 4.
1744.

THE Observations to which the inclosed Computations are made by Mr. *Morris* from somewhat more correct Elements than those in Dr. *Halley's* Tables, were carefully taken by myself, with an excellent astronomical Sector of five Feet *Radius*. You will perceive how far I am limited, by my Friend's Request ; so must intreat you, if you think it worth while, to inform the

the *Royal Society*, that *Mercury's* Motion has not been at all disturb'd, [by the late *Comet*] to do it in what manner you shall think best. I am,

S I R,

Your obedient,

Wednesday, May 23.

1744.

humble Servant,

J. Bevis.
